TRACK 03

WHAT THE SONG PRESENTS

THE MACHINE

An “electronic brain”

Does almost everything, commands, and organizes, through buttons made of iron and eyes made of glass.

THE HUMAN BEING

Flesh, blood, and consciousness

Can feel emotion, speak and listen, think and make decisions. The song turns a machine into a character, then marks its limit: it is mute.

Technology can perform tasks, but it does not replace consciousness, emotion, or human decisions.

TRACK 04

LISTENING EXCERPT

30—45 seconds from the recording

PLAYBACK CUE — Start from Gilberto Gil's official page. Test the audio before presenting; confirm the excerpt is clear and audible.

Notice repetition
"Does almost everything" returns like a refrain.

Listen for the limit
"It is mute" changes how the machine sounds.

Hear the character
The lyrics make a machine seem almost human.

TRACK 05

THE RECEPTION COMBINES INNOVATION AND STRANGENESS

Track length

The track opens the album and lasts 3:34.

Experimental sound

The album has been described as one of Gil's most experimental works at that time.

Future and technology

A review highlights reflections on the future, modernity, and the limits of technology.

Ratings

IMDb, Rotten Tomatoes, and Letterboxd mainly rate films; for this song: "not applicable."

TRACK 06

THE MACHINE HAS A LIMIT

> Only the human speaker can think, cry, speak, listen, and decide.

The song moves from a technical comparison to human identity.

GROUP COMMENT

Does this limit still make sense in the age of artificial intelligence?

Made with GAMMA

TRACK 07

TECHNOLOGY APPEARS AS A TOOL, NOT A PERSON

The song contrasts execution with people's ability to feel and choose.

AUTOMATION · CONTROL · PROCESSING

Execute

- Process information
- Automate repeated tasks
- Organize and control operations

PEOPLE MUST

Judge

- Interpret consequences
- Protect human values
- Take responsibility for decisions

Who chooses the purpose? Systems can produce answers, but people retain values and responsibility. An answer is not a value or a responsibility.

The topic connects music, computing, ethics, and the future of work.

TRACK 08

TWO USEFUL CAREER LESSONS

Evaluate effects: Judge technology by its effects on people, not only by its efficiency.

Keep thinking: Creativity and critical thinking matter when tools automate tasks.

Use tools responsibly: Check results and make conscious decisions.

A song from 1969 can still frame today’s professional choices.
